

CONSTRUCTION PRODUCTS

GYPSUM

Gypsum is used in construction for stabilisation, soil conditioning, rehabilitation & flocculation. We can provide all forms of gypsum for civil applications with advice on products such as natural gypsum, superflocc gypsum, liquid gypsum and recycled gypsum.

LIME

Pacific Fertiliser produces a variety of high analysis lime products such as Ag lime, ultra fine ag lime, liquid lime, hydrated lime and quick lime. We can recommend the right lime product for various civil applications.

COMPOST & MANURES

We can supply high quality manure and compost products for the preparation or rehabilitation of sites during construction. Products include cow manure, chicken manure, mulch and compost. These products can also be blended to reduce on-site application costs.

FLOCCULANTS

Pacific Fertiliser produces numerous products for flocculation of sediment ponds and construction site runoff. Our flocc products include SuperFlocc gypsum, liquid gypsum, Gyp-flo, Triple Strike Algae and Flocc Blocks.

BENTONITE

Pacific Fertiliser supplies both sodium bentonite and calcium bentonite products. Bentonite is used for dam sealing, channel sealing, drilling mud, landfill lining, landfill capping and as an industrial absorbent.

CONSTRUCTION PRODUCTS

DUST SUPPRESSION

Pacific Fertiliser sell a range of dust suppressant products for the construction industry. These products include road treatments, stock pile treatments and processing treatments. We supply both polymer and citrus dust suppression products.

CONTAMINATED SOIL TREATMENT

Pacific Fertiliser supply products used to remediate contaminated soils like lime for ASS, gypsum for hydrocarbons and phosphate fertilisers for heavy metal contamination. Our team can work with environmental engineers to get the best result for your project.

FERTILISER

We supply a full range of fertiliser products suitable for civil construction projects including slow release and controlled release fertilisers. These fertiliser products are available in granular, powdered and liquid form.

SEED

Pacific Fertiliser supply numerous seed products suitable for the rehabilitation of civil projects. We can tailor the seed to match the project specifications or provide agronomic advice for the best seed, fertiliser and soil conditioners to use for the job.

FENCING

We supply a full range of construction fencing products from the major suppliers suitable for temporary fencing, permanent fencing right through to chain wire security fencing.
